SKILLS

Frontend	<div><div></div></div>
Backend	<div><div></div></div>
Python	<div><div></div></div>
Java	<div><div></div></div>
Django	<div><div></div></div>

PROJECTS

<https://baramsivaramireddy.github.io/notes/>

Frontend Application / Notes

This is a static HTML page which is used to get the notes from the stored google drive using the links and embedded html tags.
We created a html pages and hosted with the help of github pages.

<https://generalmadnit.github.io/>

Fullstack Application / Notes

This is a fullstack web application for notes of our class, we have upgrade the previous project and implemented the same idea with the help of the database which is deployed in Heroku and the frontend in github pages, we have used Django framework to create the backend database and to get the frontend

KCSDE

Fullstack application / Exam Portal

Examination portal, we have used Django framework to create the backend database tables for the required information, though this is in the stage of development, just some modifications can be done to complete the work, this web application can be used to write and execute the codes as well, in some popular programming languages like python and java.
